

Citadel™

Revolutionizing Managed Perimeter Security for SMBs

Citadel is the world's first fully managed and monitored security appliance designed specifically for the SMB market. Centrally managed via AlphaControl, Citadel combines rock-solid perimeter security with effortless manageability at an affordable price, protecting your customers' networks and safeguarding valuable business information.

Why Citadel?

Centrally Managed

Manage your customers' perimeter security needs using the same, familiar platform used to manage the rest of their network, enhancing service levels and productivity while reducing maintenance.

SaaS

Boost recurring revenues by offering Security-as-a-Service

Extend and differentiate your service portfolio with our cutting-edge UTM offering, earn recurring monthly revenues and attract new customers.

Key Features

Centrally Managed and Fully Integrated with AlphaControl

Manage your customers' Citadel appliances using the intuitive and familiar AlphaControl console.

Drag & Drop Firewall Rule Management

Change the order of firewall rules quickly and easily by simply dragging and dropping a rule to its new slot.

Application Blocking

Enhance employee productivity and preserve bandwidth by blocking applications that are not required for business purposes (e.g., P2P, IM).

Clientless SSL VPN

Enable remote users to connect to the LAN over a secure SSL connection via an intuitive web portal.

Automatic Failover and Load Balancing

Dual-WAN Internet connection enables automatic failover and load balancing to ensure continuous network uptime and maximize Internet performance.

URL Filtering

Prevent users from visiting non-work related sites (e.g., adult content, gambling) that could result in productivity losses and liability issues.
