

DataShield™

Centrally Managed Cloud Based Backup & Recovery

DataShield enables you to provide SMB customers with a fully automated cloud-based backup & recovery service. Easily managed from your AlphaControl platform, this subscription-based service ensures that your customers' critical data is securely backed up, while letting you earn recurring monthly revenues.

Why DataShield?

Centrally Managed

Manage your customers' online backup needs using the same, familiar platform used to manage the rest of their network, enhancing service levels and productivity while reducing maintenance.

SaaS

SaaS offering boosts your recurring revenues

Extend and differentiate your service portfolio with cloud-based backup and recovery, earn recurring monthly revenues and acquire new customers with attractive SaaS offerings.

Key Features

Centrally Managed and Fully Integrated with AlphaControl

Manage your whole install base using the familiar AlphaControl GUI for a single unified view.

SQL, MS Exchange and Linux servers

Backup all mission-critical data across multiple server platforms with a press of a button, without interrupting your business operations.

Online and Email Reports

DataShield provides comprehensive online and email reports to ensure that your clients never miss a backup.

Military-Strength Security

A robust set of security features ensures the privacy and integrity of your customers' valuable and sensitive business data.

Fully Redundant Data Center

DataShield™ protects your data in multiple remote data centers with 24/7/365 onsite monitoring and security, as well as state-of-the-art fire suppression systems.

Smart Incremental Backup

An innovative incremental calculation and compression algorithm saves time, bandwidth and system resources.
